Do you have questions about Canvas Gradebook, Assignments or SpeedGrader? If so, then we have the session for you. The Gradebook helps instructors easily input and distribute grades for students. Grades for each assignment can be calculated as points, percentages, complete or incomplete, pass or fail, GPA scale, and letter grades, and assignments can be organized into groups for weighting as well. Any Assignment you create in the Assignments page will automatically show up in Grades.

Learn about different assignment types, how to create and organize your assignments, and how to use the Gradebook or SpeedGrader to make grading a snap.
