8/20 - Intro to Canvas

MyStudio Booth Info Session

The MyStudio Booth is a simple one button video recording setup that will capture a video image of the person as well as a computer display such as a PowerPoint presentation. MyStudio will allow users to create high-quality video projects without having to know anything about video cameras or editing. All you need is a little imagination and a flash drive. Join us as we show you how to get starting using the MyStudio Booth facilities.
