Reference, Research, and Instruction

During the 2012-2013 academic year, special collections staff directly responded to 646 requests for materials or research assistance. This represents a 15.98% increase in patron requests over the 557 from the previous academic year. Patrons visiting SCUA in person to view specific monographs or serials they had learned about through the library catalogue represented 163 (25.2%) of these requests. The remaining 483 requests (74.8%) came from patrons who sought research assistance, reference interviews, or guidance with the collections that went beyond the retrieval of materials. Please note that general reference questions from the reference desk (which are included in the first floor service desk statistics) or informational inquiries by patrons who came to SCUA to ask general library questions (assistance with finding books on the third floor, location of restrooms, etc.) are not included in these statistics.

Requests came from patrons visiting the library, as well as from those who contacted staff from off-campus locations. For record-keeping purposes, SCA staff divided these research transactions into two categories. **Outside** requests were reference or research inquiries where all facets of the process involved written correspondence, telephone calls, or email messages without the patron actually visiting the library. Requests from **here** either originated from a USFSP office, department, or employee (including other USF campuses) or involved on-site visits to the SCA reading room. All 163 requests to view specific monographs or serials involved patrons who came directly to SCA. Of the 483 research and in-depth requests, 283 took place **here** and 200 were **outside** requests where the patron submitted a query and received information without visiting the campus or the library.

Affiliation of Patrons Requiring Reference or Research Assistance:

The institutional affiliation of patrons requiring access to collections or in-depth assistance appears on the next page. Please note that many of the 483 reference interviews required multiple telephone calls, emails, or other forms of communication as the researchers developed their topics or had additional questions about the same topic. For example, graduate students in the Florida Studies program frequently met with SCUA staff to formulate their research strategies, learn about appropriate collections here and elsewhere, and receive guidance in the form of an extended RAP (Research Assistance Program) session, as well as thesis research support. These RAP sessions do not appear in the general Reference Desk statistics, though some of them involved meetings of more than one hour. When patrons possess multiple classifications (i.e., a Florida Studies student who works for the Florida Humanities Council), staff based the affiliation for each session on the primary use of the materials (i.e., if for a class, student status prevails over Humanities Council employment).

Information Requested by Patrons

The 483 research requests covered a variety of topics. In many cases, the patron sought materials in more than one of the following areas:

	<u>2012-2013</u>	<u>2011-2012</u>	<u>2010-2011</u>	<u>2009-2010</u>	<u>2008-2009</u>	<u>2007-2008</u>	<u>2006-2007</u>

Professional consultation by colleagues:	104 (21.5%)	91 (21.4%)	70 (17.9%)	58 (16.6%)	33 (10.2%)	21 (7.3%)	19 (7.4%)

As in previous years, the majority of research requests involved local and regional history research, or questions broadly covering the area of Florida Studies. The continued increase in biographical and genealogical information corresponds with specific research projects conducted by graduate students and faculty in Florida Studies.

Sources Consulted by Special Collections and University Archives Staff and Patrons

To fulfill the 483 detailed research requests, SCUA staff and patrons consulted a variety of sources. Frequently, they examined materials in more than one area of the collection.

Collection Parameters

This section of the report outlines the scope, contents, and extent of materials located in Special Collections and University Archives.

All values are estimates in linear feet

Catalogued Manuscript/Archival Collections

This category includes all manuscript, audio/visual, and USF St. Petersburg archival collections available for use, even if a full and complete finding aid does not exist. The count also includes uncatalogued manuscripts/serials in the Briggs Collection acquired with public funds. Florida Public Records Law mandates access to many documents created by USF St. Petersburg even if not fully arranged and described.

2012-2013 value (as of 1 July 2013): 523.05 linear feet

2011-2012 value (as of 1 July 2012): 511.38 linear feet

Manuscript and archival collections combined grew by 4.9% since 1 July 2009 and by 10.0% during the last two years. Available collections have grown by 85.4% since 2002-2003. The majority of the manuscript collections document Local and Regional history.

Unprocessed Manuscript/Archival Collections

This category includes materials unavailable for researchers at this time because they require additional arrangement, description, and conservation. In most cases, collections shrink in size after processing due to items consolidated and discarded (e.g., duplicate copies, removal of ephemera not considered historically valuable).

2012-2013 value (as of 1 July 2013): 140.75 linear feet

2011-2012 value (as of 1 July 2012): 131.60 linear feet

Catalogued Books, Serials, and Monographs

These items appear in the library's public access catalogue and almost always have full bibliographic records. Items are arranged by call number. Monographic collections donated or acquired from a specific person or organization are shelved by call number separately within the provenance of the donor (John C. Briggs Monographs, Suzanne Davis Hardee Collection, etc.).

2012-2013 value (as of 1 July 2013): 529.85 linear feet

2011-2012 value (as of 1 July 2012): 512.45 linear feet

2010-2011 value (as of 1 July 2011): 503.10 linear feet
