Overview of Scholars' Bank

OVERVIEW

The University of Oregon Libraries have created a digital archive for the scholarly output of the University of Oregon community. Its mission is to preserve and make more widely available to the international scholarly community the intellectual output of the University of Oregon's faculty, staff, and students. The archive has the following characteristics:

- Authors select which of their own scholarly works to deposit in the archive, as long as they meet the standards of the University of Oregon academic community. Authors are responsible for insuring that deposit of works to the archive does not violate copyright or any other relevant laws. Examples of the kinds of materials that could be deposited are:
  - abstracts of copyrighted publications, with full citations to the publication
  - conference papers not submitted for formal publication
  - course lectures or other course material
  - articles written for journals or newspapers where copyright was retained by the author
  - pre-prints and working papers
  - research materials supporting scholarly publications
  - works where the copyright has been transferred but the copyright holder permits the author to make the material freely available.
- Authors retain copyright over deposited materials (unless they sign it away to another copyright holder)
- Materials are registered, providing a means of establishing the intellectual priority of the ideas, concepts, or research contained in them
- Electronic files of any type or size will be accepted, although files exceeding 1 Gigabyte in size must be pre-approved by the Head of Metadata and Digital Library Services
- Deposited materials may be written in any language

Scholars' Bank

RESOURCE PAGE FOR FACULTY

The following resources are provided to assist faculty in submitting their work to Scholars' Bank.

As a starting point, it is helpful to review the following:

- What's in It For Me? : Reasons to Submit your Work to Scholars' Bank
- Testimonial from a Scholars' Bank Contributor / by Hilary Hart, Ph. D.
- Scholarly Communication Crisis : Background
- Open Access News & Overview
- Overview of Scholars' Bank
  - Copyright and Scholars' Bank
  - Email Notification
  - Faculty Research Community : A Place for Your Work
  - Frequently Asked Questions
  - License Agreement Text and Explanation

Faculty submitting their own work directly to Scholars' Bank are also encouraged to review the following:

- Converting files to PDF for Scholars' Bank
- Logging in to Scholars' Bank
- Step-by-step Instructions for Submitting Works to Scholars' Bank
Personalize the information

What's In It For Me?:

Reasons to Submit Your Work to Scholars' Bank

Advantages for faculty to submit to Scholars' Bank:

- Scholars' Bank can collect in one place the results of faculty research, whether it be a conference presentation, working paper, peer-reviewed article, class lecture, book review, dataset, or other type of work. For examples, click here.
- Scholars' Bank provides a unique - and stable - URL for each work that can be cited and linked to.
- Every work is archived and preserved at no cost to faculty or to their home departments.
- Citations can be added to link to materials that have been previously published or made accessible through other venues.
- Submissions are indexed in Scholars' Bank and available on the Web immediately after approval by the collection's reviewers. (If a collection has no reviewer, the work becomes available without any delay.)
- Work submitted is indexed via Google, Google Scholar, and other Web search engines. (Remember that Google's indexing can take as long as 8 weeks initially.)
- Submissions are immediately date-stamped, marking the content as having been created by the faculty member on the date of submission. (Earlier dates of availability or publication can also be added.)
- Faculty collections can be established in such a way that they mirror the peer-review process, if desired.
- Faculty may select their own keywords or terms to describe the subject of their work, if desired.
- Faculty may handle the submissions themselves without any library involvement or they may have the library do all the work for them.

How will DSpace preserve my digital material?

What is DSpace?

DSpace is a groundbreaking digital repository system that captures, stores, indexes, preserves, and distributes your digital research material.

How does it work?
Copyright and Scholars' Bank

Posting papers, presentations, or any other work in Scholars’ Bank does not mean that you give up your copyright. Authors who submit their work to Scholars’ Bank retain the copyright to their work, unless they explicitly give it away to a third party. The University of Oregon Libraries do not seek or claim copyright on any of the works submitted to Scholars’ Bank. The Libraries ask all authors to agree to a non-exclusive distribution license, which means that authors may make other copies of their work available on other websites or through other means without obtaining permission from the Libraries. They may also formally publish their work, in the same form or in a revised form, without obtaining permission from the Libraries.

Many faculty are concerned that depositing their work in Scholars’ Bank would violate copyright agreements that they have with their publishers. In reality, more and more commercial publishers are recognizing authors’ rights to post preprints of papers on their personal websites or on university servers.
Varying levels of detail

Submitting to Scholars' Bank

The Scholars' Bank archive is divided into "communities" corresponding to different organizations and academic departments on campus. Communities, in turn, create "collections" which contain individual items. You, a UO author, may have access to multiple communities and may be able to submit your works to various collections. For instance, the community "PPPM" might have a collection for "student terminal projects" where graduating students could archive their work.

The managers of the community (called Tellers) determine rules for each collection, including:

- what sorts of items are appropriate to a particular collection
- what electronic formats are acceptable in a particular collection
- who may add items
- who may view items in the collection
- etc.

In most collections the items are submitted by the authors themselves, and the authors also provide descriptive information (metadata) that will help other researchers locate their work. Tellers are also responsible for coordinating and reviewing the submissions of their communities.

For step-by-step instructions on submitting, consult the local guide.

PREPARING YOUR SUBMISSION

The Basics

The first step in the process is finding out what collection you are submitting to, and what the policies are for that collection. Is your work appropriate? What format is expected? Some collections will accept works in essentially any...

WELLCOME TRUST POSITION STATEMENT IN SUPPORT OF OPEN ACCESS PUBLISHING

The mission of the Wellcome Trust is to "foster and promote research with the aim of improving human and animal health." The main output of this research is new ideas and knowledge, which the Trust expects its researchers to publish in quality, peer-reviewed journals.

The Trust has a fundamental interest in ensuring that neither the terms struck with researchers, nor the marketing and distribution strategies used by publishers (whether commercial, not-for-profit or academic) adversely affect the availability and accessibility of this material.

With recent advances in internet publishing, the Trust is aware that there are a number of new models for the publication of research results and will encourage initiatives that broaden the range of opportunities for quality research to be widely disseminated and freely accessed.

The Wellcome Trust therefore supports open and unrestricted access to the published output of research, including the open access model (defined below), as a fundamental part of its charitable mission and a public benefit to be encouraged wherever possible.

Scholarly Communication: An Overview

Scholarly communication is considered by many academics and librarians around the world to be in a state of crisis. Rising journal prices, the increasing difficulty that faculty in some disciplines are having getting articles accepted for publication, and the growing lag times between article submission and acceptance and publication are causing many people to look around for other options. Click here for more background information.

The scholarly journal publication process has for many years provided a specific structure for registration, certification, awareness, and archiving of scholarly information. This structure, however, has become extremely expensive and less viable for universities as more publishers become high profit-margin monopolies. To achieve the restructuring of scholarly communication requires a variety of complementary and alternative approaches. Scholars and librarians have collaborated together in the last decade to develop alternative scholarly publishing initiatives. These efforts have resulted in projects that:

- increase the competitiveness of scholarly association publications
- produce new, less expensive journals
- support scholar-led initiatives
- create institutional repositories

The institutional repository effort has the potential to make a substantial difference in scholarly communication by making available a much broader spectrum of scholarly communication, including works in progress, conference proceedings, and teaching materials. The institutional repository movement is based on the highly

Campus Tree Plan
Undergraduate education at the University of Oregon occurs in an environment where teaching, research, and service are integrated and mutually enriching enterprises. Many undergraduates already engage in the UO’s research processes by working in laboratories and in the field. The Undergraduate Library Research Award program is intended to recognize students who demonstrate extraordinary skill and creativity in the application of library and information resources to original research and scholarship.

Successful projects will:
- Make extensive, creative use of library services, resources, and collections in any format.
- Demonstrate effective application of information literacy and fluency principles:
  - determining information needs

Note: We study the development of bargaining behavior in children age seven through 18, using ultimatum and dictator games. We find that bargaining behavior changes substantially with age and that most of this change appears to be related to changes in preferences for fairness, rather than bargaining ability. Younger children make and accept smaller ultimatum proposals than do older children. Even young children are quite strategic in their behavior, making much smaller dictator than ultimatum proposals. Boys claim to be more aggressive bargainers than girls do, but they are not. Older girls make larger dictator proposals than older boys, but among younger children.

University of Oregon Office of the President

Since the founding of the University of Oregon in 1876, the twenty-one presidents of the University have exercised a huge influence on the direction of education in the state and nation. The papers of these twenty-one presidents contain a unique and valuable record of the development of the University of Oregon and the history of higher education in the United States.

The purpose of this project is to highlight this rich history through selected documents from the Office of the President records and the personal papers of presidents. Students participating in the Honors College colloquium on university history and other presidential history researchers selected some of the documents displayed on the site. Currently those presidencies represented are those currently studied by students at the university. The long-term goal of this collection is to represent all of the presidencies and provide a gateway to further research.

Inside Oregon has recently been deposited in Scholars’ Bank, institutional repository for the intellectual output of the University of Oregon. Issues dating back to November 2003 of the university’s online newsletter for faculty and staff members, and graduate teaching can be accessed in searchable PDF format. The printed newsletter News & Views, Inside Oregon’s predecessor, also has been digitized and placed in Scholars’ Bank. PDF versions of News & Views are available dating back to January 1996.

The Arts and Administration Program - the only one of its kind in the Pacific Northwest - combines knowledge in the visual and performing arts with social, cultural, managerial, and educational concerns that pertain to administering both nonprofit and for-profit arts organizations and programs. Arts management is a multidisciplinary field, dedicated to increasing opportunities in arts and culture for individuals and society. A growing group of scholars critically examines issues in the arts and society from community to international-policy levels. Study of these issues is vital to effective arts management for cultural preservation and professional advancement of the arts in the United States and abroad.

The program offers an undergraduate minor in community arts and master of arts (M.A.) or master of science (M.S.) degrees in arts management.

For more information on the Program see the web site at: [http://aad.uoregon.edu/index.html](http://aad.uoregon.edu/index.html)

Scholars' Bank

TESTIMONIAL FROM A SCHOLARS' BANK CONTRIBUTOR

Hilary Hart, Ph.D.

When I handed over the completed, defended, and approved manuscript of my doctoral dissertation, I assumed that, once bound, my work of many years would hardly ever leave its shelf in the library. This prediction has so far proven fairly accurate: my dissertation has been checked out 3 times since its addition to the collection in August of 2004. As a digital file in the University of Oregon’s Scholars’ Bank, however, my work has enjoyed much higher and broader circulation. Between December 2004 and February 2006, the Scholars’ Bank listing of my dissertation has been browsed over 730 times. What’s more, an editor of a scholarly publication found my dissertation on Scholars’ Bank while searching Google and invited me to contribute to a volume he and a colleague were editing. Anyone familiar with academia knows the importance of a publication record: initial employment, tenure, and advancement depend upon it. Thus, for someone like me who is just starting out, the exposure provided by Scholars’ Bank is a huge boon.

Scholars' Bank

SERVICE FOR UNIVERSITY OF OREGON ALUMNI

In May 2003, the University Libraries launched a digital archive for campus publications, faculty research, and approved student work. The archive, called Scholars' Bank, now contains more than 2200 items and is visited an average of 344,000 times a month by researchers around the world.

In addition to capturing more and more of the new research and publications that make the University of Oregon a great institution, the library is also obtaining permission to digitize many historical works, such as the Old Oregon or the works of President Robert D. Clark and make them available in Scholars' Bank.

We would like to invite any alumni who produced a master's thesis or Ph.D. dissertation that was accepted by the University of Oregon to have their work entered into Scholars' Bank. When we have permission, the library will digitize the work (from the library's print collection) and make it freely available on the Internet through Scholars' Bank. Once it is in the archive, the full text of the work becomes searchable, there is a unique and stable URL that can be cited and linked to, and the library will preserve the files and make them permanently available. Read here for an endorsement of this service by a recent graduate of the University.

If you are interested in having your thesis or dissertation made available, please fill out Permission Form for Submission to Scholars' Bank.

If you have questions, please contact the Scholars' Bank site administrator, Carol Hixson (chixson@uoregon.edu or 346-3064) for assistance.

Correspondence

Nature 411, 521 (31 May 2001) | doi: 10.1038/35079151

Free online availability substantially increases a paper's impact

Steve Lawrence

1. NEC Research Institute, 4 Independence Way, Princeton, New Jersey 08540, USA

These letters form part of Nature's current debate on access to the scientific literature. For more examples, see http://www.nature.com/nature/debates/e-access/index.html

Sir:

The volume of scientific literature far exceeds the ability of scientists to identify and use all relevant information. The ability to locate relevant research quickly will dramatically improve communication and scientific progress. Although availability varies greatly by discipline, more than a million research articles are now freely available on the web.

Here we investigate the impact of free online availability by analysing citation rates. Online availability of an article may not greatly improve access and impact without efficient and comprehensive search services; a substantial percentage of the literature needs to be indexed by these search services before...

Copyright and Intellectual Property

Do I retain copyright to my work in KU ScholarWorks?
Yes, you retain any and all rights that you had prior to deposit. In the case of a published article where the publisher has granted special permission to you in order to deposit a paper in KU ScholarWorks, you will continue to retain those rights. We only require that you click on a Deposit Licence that grants us permission to make your work available, and confirms that you have the right to deposit it.

Why do I need to agree to the KU ScholarWorks Deposit License and what does it say?
The Deposit License is an agreement between you and the University of Kansas, allowing KU to make the work available through KU ScholarWorks, and to copy the item for preservation purposes. It is a LIMITED, NON-EXCLUSIVE agreement, meaning no copyright transfer occurs, and you retain all the rights you had before the item was deposited. The license also asks you to confirm that you do indeed own the copyright on the item, and have the right to deposit it in KU ScholarWorks. Please note that if you have published the work elsewhere, your publishing agreement may limit your ability to deposit items in repositories such as KU ScholarWorks.

What rights do I grant the University when I deposit my work in KU ScholarWorks?
You grant to the University of Kansas the non-exclusive right to:
- reproduce, translate (as defined below), and/or distribute your submission (including the metadata and abstract) worldwide, in any format or medium for non-commercial, academic purposes only.
- adapt the submission, without changing the content, in any medium or format, and

The contribution of ILD to spatial tuning, referred to as an “ILD-alone RF”. In a sample of 34 cells, individual ILD-alone RFs were distributed and amorphous, but consistently showed that the ILD spectrum is facilitatory at the cell’s best location and inhibitory above and/or below. Prior results have suggested that an IC cell's spati...

Further improvements

- Digitize documents
- Support the investigation of copyright
- Implement Creative Commons licenses
- Modify the user interface and develop searching guides
- Contribute further to code developments
Robert D. Clark

Collection home page

This collection contains works of Robert Donald Clark, President of the University of Oregon from 1969-1975.

Clark began his career at the University of Oregon as a professor of speech in 1943 and held that role until 1964. In 1946, Clark began to involve himself in university administration at UO, accepting an appointment as Assistant Dean of the College of Liberal Arts (CLA) in 1947, which he retained until being selected as Dean of CLA in 1955. In 1961, Clark was named Dean of Faculties at UO, and three years
Collaborative opportunities

- Share information
- Share strategies
- Develop federated search of repositories
- Develop shared collections
Growth over time

Growth of Scholars' Bank Over Time

2005: 68%
2004: 6%
May-Dec 2003: 4%
Jan-Mar 2006: 22%
Categories of submission: 16 months

Breakdown by Type of Material

- Library: 18%
- Students: 13%
- Faculty: 18%
- Campus Pubs.: 28%
- Other: 23%
Categories of submissions: 3 years

Categories of Materials In Scholars' Bank

- Campus: 17%
- Faculty: 34%
- Misc.: 17%
- Library: 9%
- Govt. Pubs: 6%
- Student: 17%
Challenges for the future

- Get buy-in at the highest institutional levels
- Refine the preservation program
- Keep abreast of changing technology
- Stay informed about copyright
- Develop self-submission model more fully
Strategies for future growth

- Continue to acquire content
- Continue to promote shamelessly
- Align more closely with instructional programs
- Establish a campus advisory group
- Develop searching guides
- Integrate the IR in the new website design
How do we measure success?

- Expanding access to materials
- Capturing grey literature
- Enhancing instruction
- Highlighting individual achievement
- Increasing institutional visibility
- Integrating different types of content
- Increasing collaboration
