BOR MEETING HIGHLIGHTS

Appointment of a new dean for the USF College of Education, confirmation of the granting of tenure to 59 USF faculty members and approval of new BOR policies in a wide variety of areas highlighted the July 6 BOR meeting at FIU in Miami. Dr. Roger Wilk, presently professor and chairman of the division of educational psychology at the University of Minnesota, was named dean of the College of Education.

Fifty-nine faculty members from eight of the university's nine colleges were nominated for tenure by President Cecil Mackey. All were confirmed by the Board. (Their names will be printed in a later edition of Intercom.)

In other action, the Board adopted new or revised policies regarding budget guidelines, the A & P plan of administration, termination and nonrenewal of non-tenured faculty, student admissions and career education. Career education, in particular, was the subject of considerable attention at the meeting and the Board charged the State University System to "take positive steps to blend academic and career counseling functions," as well as other measures designed to provide university students with more helpful career planning information and guidance.

The Board also spent considerable time on a new student publication policy, which was a revision of the Board's operating manual, section 7.42, to create student publications boards to serve as publishers on each SUS campus. In addition, the policy would make it possible for universities to experiment with fiscally independent student publications. However, this proposed policy was tabled for further consideration, although FSU was authorized to proceed with a plan to make its student publications independent.

The Board also heard reports on dorm visitations (that there were no flagrant violations of university policies, as had been charged), sex discrimination suits within the SUS and a detailed report on "the first thousand days" in the development of FIU, which opens in September 1972.

President Mackey called the Board's attention to USF's "Focus," BIS and "open university" programs, and to other campus activities of note during June.

FAU President Kenneth Williams announced his resignation as president effective December 31, 1972.

The next meeting of the Board will be Sept. 11 at FAU.

President Mackey has scheduled his next post-BOR meeting on July 14 at noon in Argos Cafeteria. He invites faculty and staff to join him then for a report on and discussion of the July 6 BOR meeting.

New Dean Named

Dr. Roger E. Wilk, 45, was named dean of the College of Education at USF by the Florida Board of Regents. His appointment is effective at the end of the 1972-73 academic year.

Now a professor and chairman of the division of educational psychology at the University of Minnesota, Dr. Wilk was nominated for his position by USF President Cecil Mackey.

Dr. Clarence W. Hunnicutt has been acting dean of USF's College of Education since August 1971.

"Roger Wilk is a scholarly man with broad experience in education," Dr. Mackey said. "He understands school problems and exhibits a fine balance between the academic and practical approaches to education. He has an excellent reputation as an administrator at the University of Minnesota and he works well with people. We are very fortunate to have a man of his caliber come to USF."
