New Commission Sets Focus On Postsecondary Education

What constitutes postsecondary education in Florida is the theme for the first meeting of the new Florida postsecondary Education Commission meeting at USF Oct. 2-3. The 15-member commission will meet in open session from 10 a.m.-noon, 2:30-5:30 p.m. and 7:45-10 p.m. Oct. 2 and from 9-11:45 a.m. and 1:30-4 p.m. Oct. 3 in CTR 264-265, the president's dining room.

Critical policy issues facing the State, including presentations on public universities, independent colleges and universities, community colleges, public vocational education, proprietary vocational education and adult education, will be discussed.

Members of the commission, which was established by Florida law in 1973, are Dr. Helen Popovich, USF; Michael Sciorti, HCC; Dr. William Bashaw, School Board, Manatee County; D. John Benanti, Tampa Technical Institute; Dr. Johnnie Ruth Clarke, SPJC; Rep. William R. Conway; Sen. Jack D. Gordon; Dr. H.D. "Bo" Cotton, Florida Junior College, Jacksonville; Archie Hardwick, Miami; Dr. Carl E.T. McKenny, University of Miami; William Medlin, Jacksonville; Dr. Carl W. Proehl, UWF; Dr. Joseph Stafford, SUS; Bridge Syfret, Chipola Junior College, Marianna, and Joseph Cresse, director of budgets, State Department of Administration.

Among others participating will be State Education Commissioner Ralph D. Turlington, SUS Chancellor E.T. York and President Mackey.

York: 'Career Service Employees Make an Institution What It Is'

Chancellor E.T. York and President Cecil Mackey thanked Career Service personnel last week for their support and contributions to USF.

Dr. York, a special guest at last Wednesday's reception in the U.C. Ballroom, said Career Service employees make "an institution what it is.

"You and your colleagues make this University tick," he said. "We are grateful for who you are and what you mean to USF and the State of Florida."

While predicting a "tight" year from a budget standpoint, Dr. Mackey said prospects for USF this year are "very promising." Among other items he mentioned: recent BOR funding of a $9.1 million multipurpose center; a new Business Administration Building; the opening of the new Library; the anticipated completion of the USF Medical Center in January; new student aid programs; and expansion in St. Petersburg, Fort Myers and Sarasota.

"This University would not be what it is today or have the potential it does without you," Dr. Mackey told the crowd. "The heart of any institution lies in the quality and commitment of its staff and you are as able and dedicated a staff as any in the country."

Because of the large number of Career Service employees, receptions were held both Tuesday and Wednesday afternoon.

Mackey Message — Progress Despite Problems

A Message for Faculty and Staff:

The beginning of the fall quarter -- my sixth at USF -- is always an exciting and enriching time for all members of the University community. I am pleased to be able to share it with you again and to extend my welcome to those of you who were away during the summer...and to those of you who have just joined the USF faculty or staff.

The coming year holds great promise -- and also some real problems -- for us at USF. The promise is reflected in the enthusiasm of our students (over 22,000 of them), the rich quality of our programs and the professionalism of a dedicated faculty and staff. It is revealed in the measures of our commitment to meeting the higher educational needs of the people of Florida's West Coast -- 200,000 people served in just 15 years of operation; more than 50,000 graduates; and easy accessibility to more than two million others (including, for the first time, the citizens of the Sarasota-Bradenton area). USF promise is also reflected in the constantly changing physical face of the University:

• Our new Library has just opened its doors, providing us with one of the outstanding library facilities in the region.
• Phase II of the Medical School is nearing completion.
• Construction of our new Business building will begin soon.
• Expansion of the St. Petersburg Campus has been approved by the Board of Regents, planning funds have been allocated and the City of St. Petersburg will soon begin purchase of additional land to complement our present 11-acre Bayboro Campus.

Now SUS Employees Can Take Free Six Credit Hours 'Without Catch'

Beginning this quarter, SUS employees will be eligible to receive six hours of free instruction (on a space available basis) no matter how many credit hours are attempted.

Previously, employees taking over six hours had to pay for all hours enrolled.

This change in the interpretation of Board of Regents Operating Rules, Section 6C-5.20 was made last week by Chancellor E.T. York.

In a letter to the Council of Presidents, Dr. York wrote that "in light of the changes which have occurred in the tuition interpretation seems overly restrictive and counter to the intent of the benefit."
