

USF St. Petersburg Campus Board Report

April 23, 2009

Recycling Program

The recycling program initiated by student government and the committed clubs and organizations has started off to a successful start. Initial bins have been set up in supervised areas around campus and labeled accordingly. They are being filled on a regular basis, and Student Government Marketing plans on creating more comprehensive educational and informative flyers and postings, as well as placing more bins around campus, and working in conjunction with our environmental clubs and maintenance to devise other methods of creating a more green campus.

USF St Petersburg Crow's Nest and Radio Club

The USF St. Petersburg Radio Club and Crow's Nest now find themselves with adequate funding and a shared goal of promoting online news and reporting student and campus based activities. Both Groups will have access to new radio and video equipment, adhere to the highest journalistic standards under the oversight of the publication board, and share a website to promote their common goal.

Special Events-Extended Library Hours

The Student Government Special Events club has allocated funding for the extension of our library hours every school night until the end of next week to accommodate students who are studying for finals. Student Government will be handing out drinks and also providing extended funding for security.

Student Government Budget

Through constructive dialogue, compromise, and adherence to our responsibility to the campus and the student body,

Student government has agreed upon a budget that represents the interests of the campus and student body as a whole. It was not an easy process nor as smooth as one would like, but the end result is something that Student Government is proud to have their name behind.

Matthew Perlegis

President of Student Government USFSP
