

Journal of Finance and Investment Analysis

Submission procedure

Your paper should not have been previously published or be currently under consideration for publication any place else. Manuscripts should be submitted electronically at:

http://www.scienpress.com/journal_focus.asp?main_id=69&Sub_id=Manu (http://www.scienpress.com/journal_focus.asp?main_id=69&Sub_id=Manu)

Please follow the instructions to upload the manuscript, along with any supporting material, and to enter or update your personal details. Manuscripts should be submitted as a single PDF or Doc files. Do not forget to embed all fonts when creating the PDF file and check whether the text, equations, tables, and graphs are displayed correctly when viewing the PDF file on another computer.

In case you might have problems to submit the paper electronically, please send it to: jfia@scienpress.com (<mailto:jfia@scienpress.com>)

Manuscript Preparation

To expedite the review process, please format the manuscript in ways as follow:

1. Prepare your manuscript as a single PDF or MS Word document. The file should include the complete text, references, tables and figures.
2. Manuscripts should be written in English and include a 100-250 word abstract.
3. All references should be numbered in square brackets in the text and listed in the REFERENCES section in the order they appear in the text, as shown below:

Journal Articles:

[1]M. Kosowski, "Measuring and reducing energy consumption of network interfaces in hand-held devices," IEIE Transactions on Communications, vol. E80-B, no. 8, August 1999, pp. 1225-1231.

[2]F. Clarke, J. B. Evita and D. Ledask, "Piconet: Embedded mobile networking," IEEE Personal Communications Magazine, vol. 6, no. 3, October 2006, pp. 18-35.

E-Journal Articles:

[3]S. M. Agarwel and A. Groverad, "Nucleotide Composition and Amino Acid Usage in AT-Rich Hyperthermophilic Species," Open Bioinformatics Journal, Vol. 1, 2004, pp. 18-39. <http://www.bentham.org/open/tobioj/openaccess.htm>

Books:

[4]S. Verdu, "Multi-user detection," Cambridge University Press, 1998.

Conference Proceedings:

[5] L. Claredou and J. Agrem, "Self-organizing distributed sensor networks," Proceedings SPE Conference Unattended Ground Sensor Technologies and Applications, vol. 328, Orlando, April 2003, pp. 239-247.

Copyright

Authors are requested to make sure that submitted article is neither published nor simultaneously submitted or accepted elsewhere for publication. The Scienpress Ltd as Publisher applies the Creative Commons Attribution License (<http://creativecommons.org/licenses/by/2.5/>) (CCAL) to all works we publish. Under the CCAL, authors retain ownership of the copyright for their article, but authors allow anyone to download, reuse, reprint, modify, distribute, and/or copy articles in Scienpress Ltd journals, so long as the original authors and source are cited. No permission is required from the authors or the publishers. This broad license was developed to facilitate open access to, and free use of, original works of all types. Applying this standard license to your own work will ensure your right to make your work freely and openly available.

Publication Ethics Statement

Publication Ethics

Ethical standards for publication exist to ensure the quality of the scientific publications. All journals published by Scienpress Ltd are committed to publishing only original manuscripts and work that has neither been published elsewhere (nor is under review elsewhere). So, it is critical to avoid some specific ethical violations (like plagiarism, simultaneous submission, data fabrication, duplicate publication, improper author contribution, citation manipulation)

1. Plagiarism

Plagiarism is deliberately using someone else's ideas, or other original material without acknowledging its source and without refer to him/her. Copying even small part (for example one sentence) from someone else's manuscript, or even one of your own that has previously been published, without proper citation is considered plagiarism.

2. Simultaneous Submission

Simultaneous submission occurs when a manuscript is submitted to a journal when it is already under consideration by another journal.

3. Data Fabrication and Falsification

Data fabrication and falsification means the researcher did not actually do the study, but made up the results and had recorded or reported the fabricated information. Data falsification means the researcher did the experiment, but manipulated, changed, or omitted data or results from the research findings. This would lead to public distrust and less willing to provide funding support.

4. Duplicate Publication

Duplicate publication occurs when two or more papers, without full cross referencing, share the same hypotheses, data and conclusions.

5. Improper Author Contribution

All listed authors must have made a significant contribution to the research in the paper.

6.Citation Manipulation

Citation Manipulation is including excessive citations, in the submitted manuscript, that do not contribute to the content of the article and have been included solely for the purpose of increasing citations to a given author's work, or to articles published in a particular journal.
